

SHIWAL SINGH

Associate Product Manager

+91 628 051 8773 • singhshiwal@gmail.com • linkedin.com/in/shiwal • shiwal50.github.io/portfolio • Lucknow, India

SUMMARY

5 years in B2B SaaS across customer-facing and technical roles. Built two AI products at HighLevel that shipped in 6 weeks each, reducing ticket volume by 30% and AHT from 40 to 25 minutes. Self-initiated the discovery that became JetSend at Maropost, cited by 2 enterprise clients at renewal. Transitioning into APM roles where customer intuition and structured product thinking combine from day one. McKinsey Forward alumnus. MBA in International Business, Amity University (completed April 2026).

KEY ACHIEVEMENTS

- **30% ticket volume drop and 20% CSAT increase after proposing and shipping AI Support Agent at HighLevel in 6 weeks**
- **AHT reduced from 40 to 25 minutes (37%) via Internal AI Tool for support team at HighLevel**
- **JetSend shipped in 6 weeks after self-initiated discovery across 80+ tickets; cited by 2 enterprise clients at renewal**
- Owned 3 concurrent Jira workstreams at Vartopia, caught 2 silent blockers preventing mid-cycle derailment

EXPERIENCE

HighLevel

Apr 2025 – Feb 2026

Customer Support Representative | Remote, US Market

- Analysed 500+ support tickets/month, identified top-10 CRM automation failure cluster, escalated with structured evidence; fix shipped in 6 weeks reducing that category ~30%
- Sat in release validation cycles, coordinated UAT, documented acceptance criteria, tracked post-launch defect closure
- Translated client-reported bugs into structured reproduction steps and user stories, reducing engineering triage time

AI Product Initiatives (self-initiated within role):

- **AI Support Agent for White-Label Clients (Shipped):** Proposed AI agent after 5 platform owners flagged ticket overload; aligned product, engineering, and design; shipped in 6 weeks. Result: 30% ticket drop, 20% CSAT increase.
- **Internal AI Tool for Support Team (Shipped):** Identified AHT inflation from tool-switching via team interviews and user personas; shipped in 4 weeks. Result: AHT 40 to 25 min, CSAT +5%.

Vartopia

2024 – 2025

Technical Support Engineer | Punjab, India

- Owned Jira for 3 concurrent workstreams: backlog hygiene, priority management, and scope creep flags before they hit sprint velocity
- Led sprint ceremonies (planning, grooming, retros): MOM documentation and action item closure with engineering, QA, and client stakeholders
- Caught 2 silent blockers early, preventing mid-cycle derailment on a key feature release
- Synthesised requirements from sales and CS into product specs, reducing stakeholder-to-engineering back-and-forth

Maropost

2023 – 2024

Client Support Specialist | Punjab, India

- **Self-initiated JetSend discovery:** Analysed 80+ tickets, identified systemic transactional delivery failure, structured MECE trade-off analysis, brought to PM team unprompted
- Led end-to-end delivery of JetSend in under 6 weeks: requirements definition, sprint coordination, QA sign-off, acceptance criteria
- Feature cited by 2 enterprise clients at renewal; delivery fix eliminated the primary reason for mid-contract escalations

eClerx

2021 – 2023

Analyst | Chandigarh, India

- Built KPI dashboards enabling 2-week-earlier detection of quality degradation vs previous process
- Identified process gaps through recurring issue analysis, contributed to escalation-reduction initiatives

PRODUCT WORK AND PORTFOLIO

- **GoHighLevel Product Teardown:** 9-section deep analysis of product architecture, UX, competitive moat, and opportunity surface. Written from 12 months inside the platform. shiwal50.github.io/products/

- **Maropost Marketing Cloud Teardown:** Competitive analysis vs Klaviyo, Dotdigital, and Salesforce MC. 6 prioritised opportunity areas. shiwal50.github.io/portfolio/maropost-teardown.html
- **RouCN (D2C Sneaker Brand):** Built brand, GTM strategy, PRD, and live landing page from scratch as a consumer product case study. Launching Aug 2026. shiwal50.github.io/RouCN_1.0/

SKILLS

PRODUCT	User Story Authoring, PRD Writing, Backlog Management, RICE, Kano, MoSCoW, Roadmap Planning, A/B Testing, Release Coordination, AARRR, North Star
DELIVERY	Agile / Scrum, Sprint Planning, Grooming, Retrospectives, Stakeholder Management, Cross-functional Execution, Risk Identification
TOOLS	Jira, Confluence, Figma, Notion, Postman, REST APIs, SQL, Salesforce, Freshdesk, GitHub, Trello
FRAMEWORKS	MECE, Issue Trees, Pyramid Principle, SCR, JTBD, User Personas, Design Thinking, STAR, AVEC
AI	AI Product Scoping, Prompt Design, KPI Definition, Dashboard Building, AI Workflow Automation
